

News from EUnetHTA Work Packages

First EUnetHTA project results to be publicly launched – HTAi Conference in Barcelona

The public launch of the Core HTA Model, HTA Adaptation Toolkit and Glossary, and the monitoring tools /information service on the emerging/new technologies will take place on [June 17, 2007 during the pre-conference workshop](#) of the HTAi Conference in Barcelona, Spain.

The lead partners of the work packages will present the current results of the developmental work and will be available for questions during the workshop – please register for the event on time, the number of seats is limited!

EUnetHTA will also have an exhibition booth where you would be able to meet with the work package leaders and learn more about the project .

First Core HTA Model public in June

The first EUnetHTA Core Model for HTA will be made public on the 17th of June in the Annual Meeting of HTAi in Barcelona. Simultaneously, the first practical application of the model - the core HTA on drug eluting stents - will be made public. Both documents are still drafts and subject to validation, review and refinement. [Read more on the EUnetHTA website...](#)

EUnetHTA newsletter on the emerging/new technologies

Work Package 7 (WP7), Strand B, led by the the Ludwig Boltzmann Institute of Health Technology Assessment, LBI@HTA (Austria) is developing a prototype of a structured information service on high volume, costly, rapidly developing, emerging technologies.

The prototype is scheduled to undergo in 2007 a series of evaluation by the readers from the identified relevant target groups during the EUnetHTA project. WP7 members will facilitate the evaluation exercise.

[A summary of the WP7/Strand B overview of the Horizon Scanning Systems is available on the EUnetHTA website.](#)

To ensure the transparency of the development processes, a manuscript describing the processes and procedures for an EU-wide emerging technologies newsletter is currently being developed by the Lead Partner (LBI@HTA) for publication in the peer-reviewed journal in the coming months.

First public presentation of the service will take place at the HTAi conference in Barcelona. Register on time!

European Development

EUnetHTA contributes to the Consultation and Health Strategy development
