

### Proposal for the sustainable European HTA Collaboration

Currently the Steering Committee of the EUnetHTA project is preparing a proposal for the future European HTA Collaboration (ie, beyond the project time frame 2006-2008) that includes the vision, mission, aims and values of the future EUnetHTA Collaboration, including its key functions.

The proposal will be open for the round of public consultation in November (November 1- December 1) and will provide an insight into the development plans of the EUnetHTA Collaboration. The document will be placed on the EUnetHTA website.

We hope that all interested parties will take this opportunity to comment on the proposal and send their feedback to the project secretariat.

All contributions received will be published, unless specifically indicated otherwise. Following this comment round, appropriate proposals for a sustainable European HTA Collaboration will be brought forward in 2008 in consultation with the Ministries of Health, the European Commission, identified stakeholder groups, and the EUnetHTA partners.

### **EUnetHTA Work Package 4 (WP4) Reminder: send your feedback on the Core Model and Core HTA on drug eluting stents!**

By using our online form at

<http://www.webropol.com/P.aspx?id=164117&cid=38254950>

**by the 30th of September 2007** please send your feedback on the drafts of

- a) the Core Model for medical and surgical interventions and
- b) the Core HTA on drug eluting stents.

These documents are available at [http://www.eunethta.net/Work\\_Packages/WP\\_4/Activities/](http://www.eunethta.net/Work_Packages/WP_4/Activities/).

EUnetHTA members should use a separate questionnaire that was sent to contact persons.

*This project is supported by a grant from the European Commission*
